ABOUT ME

Motivated Computer Science student with a solid foundation in programming, algorithms, and software development. I excel at problem-solving and creating innovative solutions. As a 2× hackathon finalist, I have honed my ability to think creatively under pressure and deliver impactful results. Through my academic journey, I've developed strong technical and teamwork skills and am eager to contribute to meaningful tech initiatives.

EDUCATION

MGM's College of Engineering and Technology

Noida, Uttar Pradesh

Bachelor of Technology in Computer Science and Engineering

2023 - 2027

EXPERIENCES

Training and Placement Cell

Sep 2024 - Present

Web Development Team

- Managed and maintained the college's official website, ensuring high availability, smooth functionality, and timely content updates. Implemented new features based on stakeholder feedback, optimized site performance, and addressed technical issues to enhance user experience and system reliability.

May 2025 - Present

Microsoft Learn Student Chapter

Social Media and Content Creation

- Managed MLSC social calendar, designing engaging posts and short videos for workshops and hackathons. Wrote event recaps, boosted engagement through polls and member spotlights, and streamlined our content workflow, which increased our follower count and event participation and follower base on LinkedIn and Instagram interaction by 90%. Shot and posted a few behind the scenes video for engagement for further events.

PROJECTS

CodeType

Typescript, React, Nodejs

- Built a real-time typing trainer for developers that tokenizes source code and classifies mistakes by type (syntax, whitespace, identifiers) instead of treating every typo the same, using React and a custom lexer-based diffing engine to surface exactly where muscle memory breaks down.

MyShelf

React, React Native, JavaScript, Expo

- Built MyShelf, a cross-platform reading tracker in React Native with custom auth and protected routes, real-time cloud sync, file-based navigation via Expo Router, and full light/dark theming — a small app built with production-grade architecture underneath.

COURSES AND CERTIFICATIONS

Mastering Data with Machine Learning

IBM SkillsBuild x CSRBOX

Oct 2024 - Nov 2024

- Gained hands-on experience in data analysis, machine learning algorithms, and model evaluation using Python and relevant libraries such as Pandas, Sci-kit Learn, etc. and built machine learning models to solve real-world problems, focusing on data pre-processing, feature engineering, and model optimization

SKILLS

Skills: C, Python, HTML, CSS, JavaScript, React, Node.js, Express.js, PostgreSQL, Java, MongoDB, Hibernate, JDBC, REST API, Microservices, React Native

Personal Skills: Team Worker, Detail-Oriented, Hard Working, Adaptable, Efficient
